Professional Summary

Software Developer with 2+ years of experience in full-stack web development using PHP, Python, and JavaScript. Experienced in building and maintaining web and mobile applications, working with REST APIs, and integrating third-party services like payment gateways. Hands-on experience in Python libraries such as OpenCV and OCR for automating invoice and voucher data extraction, along with basic knowledge of object detection using YOLO. Strong understanding of business modules including Sales, Inventory, HR, and Payroll systems.

Technical Skills

Programming: Python, PHP, JavaScript

Frontend: HTML, CSS, Bootstrap, BeerCSS

Backend: Django, REST APIs

Database: MySQL

Libraries/Frameworks: OpenCV, OCR, YOLO

Tools: Visual Studio Code, MySQL Workbench

API Tools: Postman, Insomnia

Domain Knowledge: Sales, Inventory, HR & Payroll Systems

Professional Experience

Software Developer

Feb 2024 – Present

Xpert Homes – Hyderabad

- Working on Epicor CRM for developing and maintaining web and mobile applications
- Developed CRM modules using PHP, MySQL, JavaScript, HTML, and CSS
- Built responsive UI components using Bootstrap and BeerCSS
- Integrated REST APIs to enhance CRM functionality
- Developed student and staff modules for SuccessCollege product
- Worked on Python-based solutions using OpenCV and OCR to automate data extraction from vouchers and invoices
- Implemented object detection concepts using YOLO for basic image processing tasks
- Developed server-side libraries for integrating payment gateways using Gateway APIs
- Designed, developed, and tested REST APIs
- Used Postman and Insomnia for API testing and debugging
- Gained knowledge of Sales, Inventory, HR, and Payroll modules

Projects

XpertHomes CRM

Role: Software Developer

Technologies: PHP, JavaScript, HTML, CSS, MySQL, REST APIs

- Developed and maintained CRM modules for web and mobile applications
- Implemented business functionalities related to sales and customer management
- Integrated REST APIs for seamless data communication
- Worked on API development, testing, and consumption using tools like Postman and Insomnia

SuccessCollege Application

Role: Software Developer

Technologies: PHP, JavaScript, HTML, CSS, MySQL

- Developed student and staff management modules
- Handled data operations and UI development for academic workflows
- Created and managed backend functionalities for smooth data processing

Epicor CRM

Role: Software Developer

Technologies: PHP, JavaScript, HTML, CSS, MySQL, REST APIs

- Worked on CRM modules for enterprise-level application

- Improved existing features and implemented new functionalities
- Designed responsive dashboards and integrated backend APIs
- Developed server-side libraries to integrate payment gateways using Gateway APIs
- Gained expertise in API writing, testing, and integration

Inventory Counting Application

Role: Software Developer

Technologies: JavaScript, HTML, CSS, APIs

- Developed inventory counting features with real-time data handling
- Worked on API integration for stock and inventory updates
- Improved UI for mobile and web compatibility
- Ensured accurate data synchronization between frontend and backend systems

Python Automation & Computer Vision

Technologies: Python, OpenCV, OCR, YOLO

- Developed automation solutions using Python libraries like OpenCV and OCR to extract data from vouchers and invoices
- Automated posting of extracted data into transactions and master records
- Implemented basic object detection using YOLO for image processing tasks

Education

B.Tech – Electronics and Communication Engineering

Pace Institute of Technology and Sciences

2023

CGPA: 8.64

Certifications

- AWS Cloud Computing Foundation
- Programming Essentials in Python – CISCO
- Python Full Stack Course – Vcube
- Frontend Development (HTML) – Great Learning

Achievements

- Awarded AICTE Scholarship for academic excellence
- Represented college in Volleyball team
